***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5 and 10, drawn to detecting the presence of a CCAAT-displacement protein/ Cut homeobox (CDP/ Cut) isoform comprising contacting a sample with an antibody. Claims 1-4 will be examined with this Group to the extent a protein is detected.

Group II, claim(s) 1-4 and 9, drawn to detecting the presence of a RNA transcript encoding a CCAAT-displacement protein/ Cut homeobox (CDP/ Cut) p75 isoform. Claims 1-4 will be examined with this Group to the extent a nucleic acid is detected.

Group III, claim(s) 6 and 7, drawn to an antibody, which specifically recognizes the CDP/ Cut p200 isoform.

Group IV, claim(s) 8, drawn to an antibody, which specifically recognizes the CDP/ Cut p75 isoform.

2. The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The special technical feature recited in claim 1 is detecting the presence of a CCAAT-displacement protein/ Cut homeobox (CDP/ Cut) isoform comprising contacting a sample with an antibody. Moon et al. (Int. J. Cancer 100: 429-432, August 2002) teaches Western blot analysis of matched tumor and adjacent myometrium, where there was an increased number of small truncated CDP/Cux isoforms in uterine leiomyomas

as compared to lower levels in normal control tissue, see abstract; page 430, Results...section; and page 431, Table II. Therefore, the technical feature recited in claim 1 is not special. Accordingly, the groups are not so linked as to form a single general concept under PCT Rule 13.1.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

5. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Alana M. Harris, Ph.D. whose telephone number is (571) 272-0831.
